Assembly Instructions for Tamiya 1/16 Scale Tiger I late idler wheel

General Instructions

You need to have the following tools at hand:

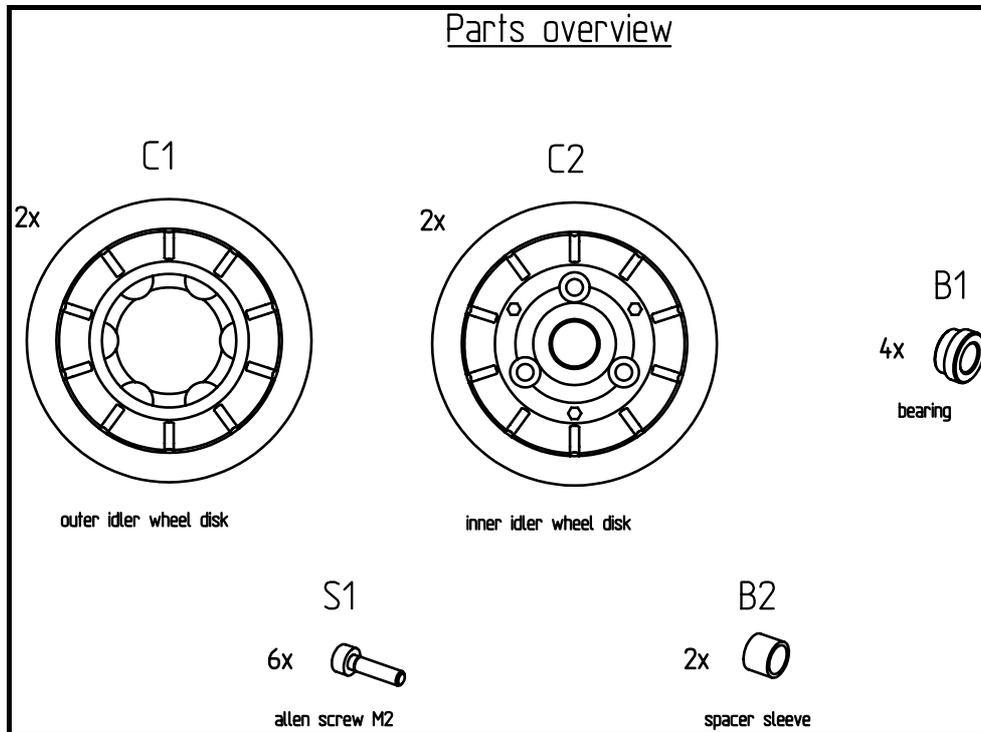

- small metal saw
- small file and sanding paper (400/120)
- Allen key 2 mm

Note: All measurements are specified in millimeters!
25.4mm = 1" inch

Some waste plugs and burr need to be removed, using a file or sanding paper, before commencing assembly. Always test the fitting of the parts prior to use.

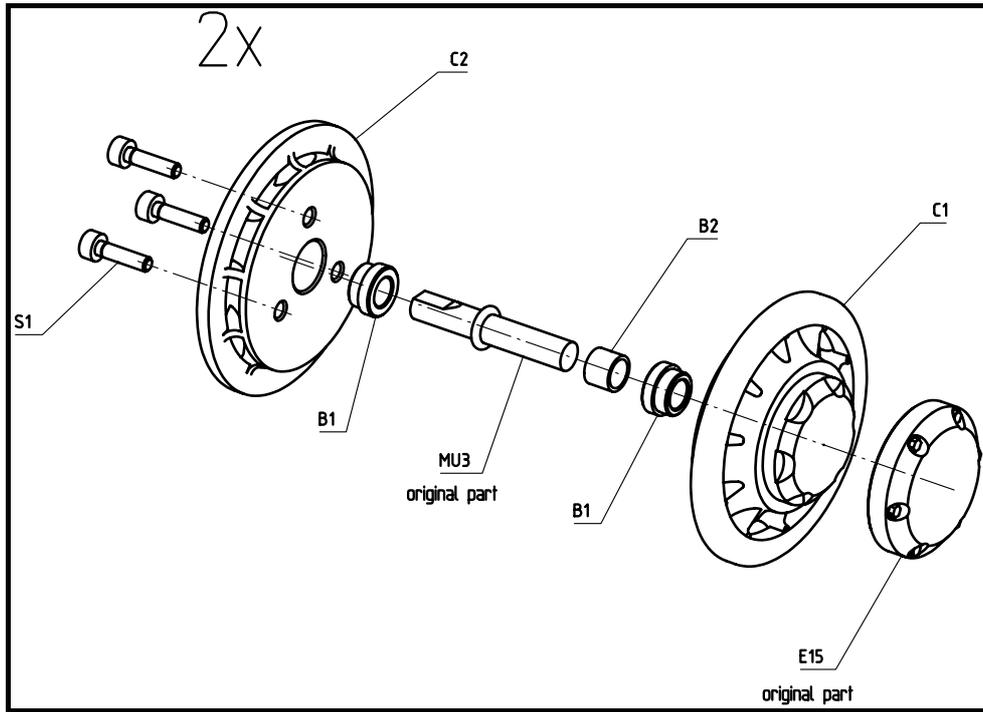

The parts included in this kit replaces the original idler wheel parts. Only the axels and outer wheel covers of the original kit are needed as shown below.
